OVERVIEW

Our journey started a decade ago with a wish to help universities around the world to improve their admissions processes and reach recruitment targets through innovative IT solutions. When looking back to this amazing and challenging journey of 10 years, with over one million happy applicants and hundreds of satisfied education institutes served, we are not far away from success.

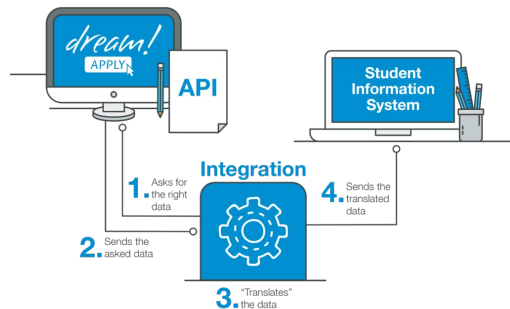

Designed with and for education institutions

DreamApply is designed for education institutions looking to increase student enrollment while reducing workload and easily manage their admission and marketing efforts.

A world-class digital solution used by more than 300 satisfied education institutions worldwide

Customization

You can create separate workflows for each team member to suit their tasks and professional needs with personalised checklists. Admissions, marketing and finance teams can work harmoniously in one platform with ease.

- Tailor the application pipeline to suit your needs with personalised checklists and eliminate time-consuming work with automation rules.
- Make your application processes faster and more convenient for both your applicants and staff.
- We offer a fully-featured RESTful API to connect to any system or CRM on your campus.
- DreamApply is constantly being updated with quality of life improvements and new features rolled out monthly.
