OVERVIEW

ALPA Kids develops e-learning games for children aged 2-8, their parents and teachers to help children learn the essentials like colours, numbers, the alphabet etc through the examples of their own culture and local nature. **The ALPA Kids app is easily adaptable to any language and culture with the focus on localizing the e-learning games for less spoken languages.**

“Every child deserves the chance to use quality digital content in their native language”

Co-created. ALPA games are created in collaboration with Estonian TOP schools and preschools. The games are localized for new markets together with local teachers.

Age-appropriate. The games are divided into four difficulty levels to be as age-appropriate for the child as possible. ALPA curriculum consists of more than 60 e-learning games!

Lets guide screen-time towards positive and educational content!
