

Estonia: Smart Solutions for Education Innovation

Estonia has become a successful role model in education worldwide. According to PISA 2018, Estonian basic education is 1st in Europe and among the best in the world. Estonia is an education nation, while also being a digital nation – known as an innovative e-state.

Estonia is a well-known education innovator in the world and has highest number of start-ups per capita in Europe, which includes brilliant EdTech companies reshaping the education scene.

Estonian digital solutions at Bett UK 2022

We are eager to offer innovative solutions and share expertise in modernising education and making the most of technological possibilities, especially during this still ongoing COVID-19 crisis. Our aim is to advance your education system, whether it be through digital solutions, consulting, training or other.
